The International Planning History Society (IPHS) is dedicated to the enhancement of interdisciplinary studies in urban and regional planning history worldwide. The 17th IPHS Conference was held in Delft, The Netherlands, from July 17 to 21, 2016.

The conference theme ‘History – Urbanism – Resilience’ inspired contributions investigating a broad range of topics in planning history: modernisation, cross-cultural exchange, and colonisation; urban morphology, comprehensive planning, and adaptive design; the modern history of urban, regional and environmental planning more generally; destruction, rebuilding, demographics, and policymaking as related to danger; and the challenges facing cities around the word in the modern era.

Convener:
Carola Hein, Chair, History of Architecture and Urban Planning.

This is the information booklet of the 17th IPHS conference. The full conference proceedings consist of seven volumes and one Book of Abstracts and can be found and ordered online. The seven volumes follow the organisation of the conference in seven themes, each theme consisting of two tracks and each track consisting of eight panels of four or five presentations. Each presentation comprises an abstract and a peer-reviewed full paper, traceable online with a DOI number.

One of the most exciting features of the 17th IPHS conference is the book exhibition that takes place in the Zuidserre from Monday 18th until Wednesday the 20th. The local organization committee has worked with several major publishing companies in order to have the most recent publications on Planning History available for display or sale.

Here you will find copies of the 7 volumes of the conference proceedings and the book of abstracts of the conference. Apart from books you will also find order forms for individuals or university libraries as well as various advertising material of the publishers.

These are the participating publishers:

1. African Architecture Matters
2. Birkhauser
3. Bristol University Press
4. Chicago University Press
5. Combined Academic Publishers
6. Cornell University Press
7. Combined Academic Publishers
8. I.B. Tauris
9. Jap Sam Books
10. Liverpool University Press

TRANSPORT
The Netherlands has an excellent public transport system. From Delft you can reach the heart of Rotterdam in less than 20 minutes by train, it takes less than an hour to get to Schiphol airport. You can either buy one-time use tickets at the yellow ticket machines in every train station, or buy an anonymous OV-chip card (E7.50). An OV chip card is valid for all types of public transport. More information: www.ov-chipkaart.nl & www.ns.nl.

PLANNING YOUR JOURNEY
Plan your journey with public transport planner 9292.nl.

ADDRESSES
The conference takes place at the Faculty of Architecture and the Built Environment, Julianalaan 134 2628 BL Delft.
The conference reception takes place at Museum Rotterdam, Rodezand 26 3011 AN Rotterdam.
The conference dinner takes place at Art Centre Delft, Rotterdamseweg 205 2629 HD Delft.

PROCEDINGS
The conference proceedings will be open access available via books.bk.tudelft.nl. A print on demand (PoD) option is also available there. It is also possible to buy a hardcopy during the conference at the Book Exposition.

ADDITIONAL ACTIVITIES

CONFERENCE RECEPTION
Taking place in the Rotterdam Museum located in OMA’s most recent building in Rotterdam, the Timmerhuis, this year’s IPHS conference reception has found yet another fantastic venue for the conference reception. Marije ten Kate (Head planner of City Development, Rotterdam) and Paul van de Laar (General director of Museum Rotterdam and Professor of Urban History) will deliver a talk on the relevance of History – Urbanism – Resilience in the view of contemporary city planning.
18 July 2016, 20:00-22:30 | Museum Rotterdam (Timmerhuis, Rodezand Rotterdam) | Free
Register for the conference reception at the additional activities registration desk.

HALF-DAY EVENING TOURS
Delft through the courtyards
Willemijn Wilms Floet (assistant professor in Architecture) just obtained her doctorate on topic of the Little Courtyard, 1400-2000, invisible building blocks in the Dutch City. She will guide us through the well hidden secrets of these hofjes (Dutch for little courtyards) as resilient micro-structures in the urban fabric of Delft. More information on page 40 and 41.

Visit to the Archives of Het Nieuw Instituut
Het Nieuwe Instituut, the former Dutch Architecture Instituut (NAI), offers a behind the scenes tour by senior archivist A. Marks. A selection of unique material in the collection of Het Nieuwe Institut, with for example C. van Eesteren, H.P. Berlage, J.J.P. Oud and R. Koolhaas will be shown.
This tour takes place in Het Nieuwe Instituut (Museumpark 25, Rotterdam) on Tuesday 19 July, 17:00-18.15.

RDM Campus, Rotterdam
Havenbedrijf Rotterdam offers a guided tour through the innovative RDM Campus in Rotterdam. RDM Rotterdam is the showcase and accelerator of innovation in the port and city of Rotterdam. In recent years the former wharf of the Rotterdam Drydock Company (RDM) has been redeveloped into an innovative cluster. It is here, in the heart of the port area, that you’ll find a unique combination of business, education and events.
A limited number of places are available for all tours. Book your tour as soon as possible at the Additional Activities Registration Desk.

CONFERENCE DINNER AND BOAT TOUR
At 18:00, 20 July 2016, a boat will depart from Koornmarkt 113, Delft that will make a short tour through Delft after which it will drop us off at the Art Centre in Delft, Rotterdamseweg 2015, where the conference dinner will take place.

Additional Costs 50+17.50 € | Book your ticket as soon as possible at the Additional Activities Registration Desk.
FORMER MONASTERY AREAS

Most monastery complexes in Holland vanished without a trace because of the reformation around 1560. Exceptions are the cloisters that were confiscated as a stadholders’ (governors’) residence and beguines courtyards that the protestant government turned a blind eye to because the beguines had always kept one leg in their courtyard and the other in society. Delft has intact examples of both, located nearby under the same urban conditions. The Agathaklooster (now Prinsenhof named after the founding father of the Netherlands who was shot in his residence here in 1584) and the Bagijnhof used to be gated communities next to the city wall. After the demolition of the city wall (1830) and the city moat filled up (1967), these areas were connected to the city openly. Their green character and deviating building typology make them special places. For the Delft residents living in the west part of the city they serve as a short cut. The Prinsenhof is a multifunctional complex that kept its buildings (of course many were renewed and converted), but changed purposes and arrangements of rooms several times. The heterogeneous group of buildings at the (13th century) Bagijnhof is the result of rebuilding individual premises. The large scale buildings on the south side used to be hospitals and in the 1970’s changed into student housing.

MILITARY AREAS

Delft has a very long history in military industry going back to the end of the 16th century. The city used to be at the centre of producing and storing weapons and munition for the united States of Holland. Recently, the last living remains of this military history, the National Army Museum, in the former Armamentarium, closed its doors. This military history left the city barracks, but more importantly, left substantial pieces of empty land, quite isolated, near the east wall, which was used for training originally (civic guards). From the 1920’s this part of the city housed several very large buildings, like a theatre and faculty buildings for the Delft School of Polytechnics. When this University of Technology decided to concentrate faculties on the campus south of the historical city, the area was redeveloped into a green, low-car private housing neighbour (this project is among the firsts showing the shift from social housing to a market orientation in the Netherlands) in which the future owners had freedom to design interiors (lofts in the former library buildings) and houses, enclosing the Doelentuin. A collective apartment building design by the urban masterplan director Fons Verheijen was equipped with a half open screen mirroring the park. Attached to this site other small scale innerblock housing projects were built, following the courtyard typology, like in the Schuttershof. A former courtyard barrack (built after the Delft Thunderbolt that laid half the historical city in ashes here in 1584) and the Bagijnhof used to be gated communities next to the city wall. After the demolition of the city wall (1830) and the city moat filled up (1967), these areas were connected to the city openly. Their green character and deviating building typology make them special places. For the Delft residents living in the west part of the city they serve as a short cut. The Prinsenhof is a multifunctional complex that kept its buildings (of course many were renewed and converted), but changed purposes and arrangements of rooms several times. The heterogeneous group of buildings at the (13th century) Bagijnhof is the result of rebuilding individual premises. The large scale buildings on the south side used to be hospitals and in the 1970’s changed into student housing.

URBAN RENEWAL GAPS

The last category of inner block urban space consists of cleaning up and thinning out 19th century buildings that were built in the middle of a block, like schools and industry. Good examples are a u-formed courtyard of 6 houses in the Hoysterstraat, a lighted green place halfway a dark stoney alley; ’t Carto, in which a large green circle creates unity amongst all sorts of backs; ’t Hartje, a childrens playground named after the resident and photographer of a local newspaper who took the initiative for its creation.

EXCURSIONS

DUTCH WATER

In this country that mostly lies below sea level, the Dutch are known for their waterworks. Professor of Heritage & Cultural Value Paul Meurs will guide a trip that explores the Dutch Delta works from the windmills of Kinderdijk to the Oosterscheldekering (Eastern Scheldt Storm Surge Barrier).

IJSSELMEER

Professor Frits Palmbooom, head of the Van Eesteren Chair will guide us through the Dutch Delta landscape in a tour around the IJsselmeer. Special attention is given to the plans of Dutch urbanist Van Eesteren. The trip starts with a visit to the Van Eesteren Museum in Amsterdam, whereupon we will visit Marken, Monnickendam, Hoorn, and drive across the Ijsselmeer to ‘New Town’ Lelystad.

ROTTERDAM

Professor of Urban History Paul van de Laar (director of Museum Rotterdam) and Hilde Sennema will host an excursion about the history of Rotterdam. Rotterdam, as a reconstructed city after World War II, is characterized by optimism and a belief in the future. The excursion will visit the centre of Rotterdam in the morning (by foot), and the garden cities of Rotterdam in the afternoon (by bus).

AMSTERDAM

The Amsterdam excursion will be guided by Erik van der Kooij (Urban Planning and Sustainability, Municipality of Amsterdam). The morning excursion will provide insight in the historic centre of Amsterdam (most probably by boat) and will be hosted by the Monument Agency of Amsterdam. The afternoon tour (by bus) will visit examples of modern city planning in Amsterdam and focuses on the development of the 12 waterfront.

HISTORIC TOWNS

Guided by Reinout Butte, author of the Atlas of the Dutch Urban Landscape, this excursion will visit the Dutch historic towns Utrecht, Vianen, Amersfoort and Gouda. These four cities will together tell the story of 2000 years of urbanization in the Dutch cultural landscape.

Unfortunately, the Historic Towns Excursion is full. It is still possible to register for all other excursions until Monday 20th July, 18:00. Make sure to book your excursion in time at the additional activities registration desk.
